EDUCATION

M.S.Ramaiah University of Applied Sciences

Bachelor of Technology

Major in CSE-Information science and engineering

Cumulative GPA: **9.32/10.00**

Relevant Coursework: Database Systems, Computer Networks, Operating Systems, Artificial Intelligence, Design Patterns.

Karnataka

Jul 2020 - Jul 2024

Expert Pre University Karnataka

Percentage: **91.04%**

Jul 2018 - Jul 2020

WORK EXPERIENCE

Ecolab

Associate Software Engineer

Sept 2024 -Present

- Developed and maintained ETL pipelines for the OneCustomer initiative using **Snowflake, Azure Data Factory (ADF), and Fivetran**, ingesting MDM source data into ILA layer tables with accurate mapping, validation, and reconciliation, ensuring high-quality data for downstream reporting and analytics.
- Built and optimized **SQL queries and stored procedures in SSMS** for the BIC initiative, improving data processing efficiency, scalability, and reliability across large enterprise datasets.
- **Automated data processing pipelines using Azure Data Factory**, ensuring seamless execution, reducing manual intervention, and delivering accurate and timely data for the EBR frontend application.

GeeksforGeeks

Technical content writing Internship

Feb 2023 – Aug 2023

- Architected and delivered solutions to articles on Android application concepts, reaching an average of 1,300 views per article.
- Designed and implemented new problems using Java programming language.

UNIVERSITY PROJECTS

CureConnect: Streamlined Health Integration

June 2024

- Developed CureConnect, a machine learning-based healthcare platform that predicts possible diseases from user-reported symptoms, enabling early diagnosis and personalized care.
- Implemented Machine Learning driven features for appointment scheduling and doctor recommendations, improving healthcare access and user experience

An Intelligent Laptop Trading application with Price Prediction

Dec 2023

- Developed a machine learning-powered laptop trading web application that enables users to list laptops for sale, browse available listings, and make purchases, integrating full-stack web development with predictive modeling.
- Built and deployed a supervised machine learning model to estimate realistic laptop prices based on key specifications, enhancing marketplace trust and decision-making for both buyers and sellers

Medical health insurance cost predictor : [link](#)

May 2023

- Built a predictive model for health insurance prices with an accuracy of **89.2%**
- Utilized Gradient Boosting algorithm to optimize predictions.

SKILLS

- **Programming Languages:** Proficient in Java and Python for problem solving and developing applications and implementing algorithms.
- **Web Development and Database:** Skilled in HTML, CSS, JavaScript, PHP, and MySQL for creating interactive and dynamic web applications with database integration.
- **Advanced Skills:** Experienced in Snowflake, Azure, Fivetran, Machine Learning, Cyber Security, Version Control using Git.

ACHIEVEMENTS

- **Rank 6** in the GeeksforGeeks coding platform at the university level.
- **Smt. Venkatamma Ramaiah Silver Medal for Second Best Overall Academic Excellence**
- **Best Project Award** for the project 'CureConnect:Streamlined Health Integration' at university level
- **Rank 259** in GeeksforGeeks weekly coding contest 111.
- **Certifications** : SnowPro Associate : Platform Certificate,Machine Learning in Python-Perfect E-Learning, Problem solving-HackerRank, SQL-HackerRank, Azure data fundamentals-Microsoft and also actively participated in hackathons, including Smart India Hackathon,Flipkart Grid.
